

# Ram Flow

Ratios adjustable from  
3.5:100 to 15:100

Output adjustable to more  
than 1 gallon per minute

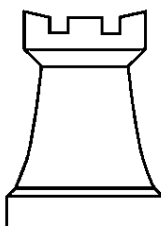

Accurate to within 1%

Pumps directly from a  
55-gallon drum.

Full performance, maximum simplicity, minimum price

The Ram Flow is a simple, yet highly capable, dispensing machine for dispensing two part, high viscosity materials. Using a Ram Flow eliminates weighing and mixing errors. Easy slide ratio adjustment simplifies to any necessary changes. Included is a convenient solvent flush system. The Ram Flow delivers a constant flow of accurately metered material through a static mix head. A spray gun is available for spray mold making.
