

VR-5

Variable Ratio Dual 5 Gallon Ram Dispense System

A simple to operate, yet highly capable, dispensing machine.

Designed for use with paste materials.

Compatible with:

Epoxies, silicones, Methacrylates, Urethanes, Acrylics.

- Pumps directly from 5 gallon shipping container.
- Reduces material handling.
- No messy transfer of materials
- Eliminates weighing/mixing errors.
- Very flexible ratio adjustment.
- Easy slide ratio adjustment.
- Dispenses a wide range of viscosities, liquid to paste.
- Can handle very difficult, moisture sensitive or abrasive materials.

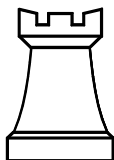

The VR-5 pumps directly out of 5 gallon, open head shipping containers. Dual cylinder rams insure positive material feed.

A hand gun with snuff back ensures accurate, clean adhesive placement.

Simple durable piston pumps ensure long life and easy maintenance.

Robust twin lip ram plate for effective leak-resistant seal.

Full performance, maximum simplicity, minimum price
